

**Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A system for displaying information on a first screen (16) connected to a programmable logic control means (14), which in turn is connected to an electronic device (19), which includes a second screen (17), via a data input/output means (15), wherein the first screen (16) displays inverted the same information data as that displayed by the second screen (17), such that a passenger in a motor vehicle can read the image obtained from the first screen (16), reflected in a windscreen of the vehicle.

2. (Currently Amended) The system as claimed in claim 1 for displaying information[[;]] wherein the motor vehicle is a motor car.

3. (Currently Amended) The system as claimed in claim 2 for displaying information[[;]] wherein the first screen is located so that the reflection thereof can be received by ~~the passenger is~~ the driver of the motor car.

4. (Currently Amended) The system as claimed in claim 2 for displaying information[[;]] wherein the windscreen is the front windscreen of said motor car.

5. (Currently Amended) The system as claimed in ~~claims 3 and 4~~ claim 4 for displaying information[[;]] wherein the first screen (16) is located on the dashboard of the motor car, such that the driver cannot directly read the information data displayed by the first screen (16) whilst he is driving.

6. (Currently Amended) The system as claimed in claim 5 for displaying information[[;]] wherein the first screen (16) forms a predetermined angle with the front windscreen.

7. (Currently Amended) The system as claimed in ~~claims 1 and 6~~ claim 6 for displaying information[[;]] wherein the electronic device (19) is a portable electronic device.

8. (Currently Amended) The system as claimed in claim 7 for displaying information[[;]] wherein the portable electronic device (19) is a mobile telephone.

9. (Currently Amended) The system as claimed in claim 1 for displaying information[[;]] wherein the programmable logic control means (14) is a computer.

10. (Currently Amended) An equipment terminal (18) ~~as claimed in claim 1~~ for employing the system of claim 9; which includes the first screen (16) connected to the programmable logic control means (14), which in turn is connected to the electronic device (19) via the data input/output means (15).

11. (Original) The equipment terminal (18) as claimed in claim 10; which also includes a receiver means (13) which is designed to receive radio-electric signals emitted from an emission means which is included in the data input means (12).

12. (Original) The equipment terminal (18) as claimed in claim 11; the radio-electric signals emitted are infrared rays.

13. (Original) The equipment terminal (18) as claimed in claim 11; which also includes an acoustic warning means which is designed to generate a voice message corresponding to the information displayed visually on the first screen (16).

14. (Original) A data input means (12) as claimed in claim 11; which includes the emission means and also a

plurality of keys which are designed to be activated using at least one finger of one hand.

15. (Currently Amended) The data input means (12) as claimed in ~~claims 2 and 14~~ claim 14, which is located in the steering wheel (11) of the motor car.

16. (Original) The data input means (12) as claimed in claim 14, which includes a touch screen to generate an order corresponding to a predetermined area of this screen, such that an infrared signal is generated, which is emitted by the emission means.

17. (New) The system as claimed in claim 3 for displaying information wherein the first screen (16) is located on the dashboard of the motor car, such that the driver cannot read the information data displayed by the first screen (16) whilst he is driving.

18. (New) The system as claimed in claim 17 for displaying information wherein the first screen (16) forms a predetermined angle with the front windscreen.

19. (New) The system as claimed in claim 1 for displaying information wherein the electronic device (19) is a portable electronic device.
